1. Applicant's election with traverse of the election of species in the reply filed on May 4, 2005 is acknowledged. The traversal is on the ground(s) that the Examiner has not provided reasons why examining all of the species would be a serious burden. This is not found persuasive because the various details of all of the various species have to be searched. For example, the air curtain of Fig. 2a and claim 3 and the gas blower openings of Fig. 3 and claims 4 and 8 would have to be searched.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 2-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 4, 2005.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kopko. Kopko discloses a device comprising a working space 32 or 34 and an equipment space 36 with a heat exchanger 30 therein. Blocking devices 22-28 control the exchange of gas between the working space and the equipment space.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
